

Appln No. 10/045,184

Amdt date January 31, 2005

Reply to Office action of February 28, 2005

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A two-component dental bleaching system wherein the components are adapted to be admixed and applied to the teeth from a dental tray for sustained contact, said system comprising:

as a first component, a dental peroxide gel comprising both carbamide peroxide and hydrogen peroxide; and

as a second component, an orally compatible activator gel wherein said activator gel includes a base[-], and wherein neither the first or second components incorporate a radiant energy or a heat-energy absorbing activator substance.

2. (Original) The dental bleaching system according to claim 1, wherein the first component includes hydroxypropyl cellulose.

3. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide peroxide at a weight percentage of at least about 10%, based on the total weight of said first component.

4. (Original) The dental bleaching system according to claim 1, wherein the first component comprises hydrogen peroxide

**Appln No. 10/045,184**

**Amdt date January 31, 2005**

**Reply to Office action of February 28, 2005**

at a weight percentage of at least about 0.5%, based on the total weight of the first component.

5. (Original) The dental bleaching system according to claim 1, wherein the first component comprises hydrogen peroxide at a weight percentage of at least about 5%, based on the total weight of the first component.

6. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide peroxide at a weight percentage of at least about 16% and hydrogen peroxide at a weight percentage of at least about 1.5%, based on the total weight of the first component.

7. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide peroxide at a weight percentage from about 10% to about 25% and hydrogen peroxide at a weight percentage from about 0.5% to about 10%, based on the total weight of the first component.

8. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide peroxide at about 16% by weight and hydrogen peroxide at about 1.3% by weight, based on the total weight of the first component.

9. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide

**Reply to Office action of February 28, 2005**

peroxide at about 16% by weight and hydrogen peroxide at about 6% by weight, based on the total weight of the composition.

10. (Original) The dental bleaching system according to claim 1, wherein the first component comprises carbamide peroxide at a weight percentage of about 16% and hydrogen peroxide at a weight percentage of about 10%, based on the total weight of the composition.

11. (Original) The dental bleaching system according to claim 1, wherein the activator gel additionally comprises sodium fluoride and potassium nitrate.

12. (Original) The dental bleaching system according to claim 1, wherein the activator gel additionally comprises potassium nitrate and tetrapotassium pyrophosphate.

13. (Previously Presented) A two-component dental bleaching system wherein the components are adapted to be admixed and applied to the teeth for sustained contact, said system comprising:

a first component comprising both carbamide peroxide and hydrogen peroxide; and

a second component comprising a compatible activator gel wherein said activator gel includes a base to increase its pH, and a component selected from the group consisting of:

Propylene Glycol	49.97% by wt.
hydroxypropyl cellulose	1.980% by wt.

**Appln No. 10/045,184**

**Amdt date January 31, 2005**

**Reply to Office action of February 28, 2005**

Glycerin	38.100% by wt.
Peppermint Flavor	0.200% by wt.
Natural Peppermint	0.400% by wt.
Oil	
DI Water	0.500% by wt.
Sodium Fluoride	0.350% by wt.
Fumed Silica	8.200% by wt.;

Propylene Glycol	45.576% by wt.
Hydroxypropyl Cellulose	1.980% by wt.
Glycerin	40.000% by wt.
Peppermint Flavor	0.200% by wt.
Natural Peppermint	0.400% by wt.
Oil	
Fumed Silica	11.000% by wt.
DI Water	0.544% by wt.;

Propylene Glycol	40.767 % by wt.
Hydroxypropyl Cellulose	1.980% by wt.
Glycerin	32.753% by wt.
Artificial Cherry Flavor	0.600% by wt.
Fumed Silica	5.600% by wt.
Potassium Nitrate	5.400% by wt.
DI Water	12.600% by wt.;

Propylene Glycol	40.767% by wt.
Hydroxypropyl Cellulose	1.980% by wt.
Glycerin	32.753% by wt.

Peppermint	0.200%	by wt.
Natural Peppermint	0.400%	by wt.
Oil		
Fumed Silica	5.600%	by wt.
Potassium Nitrate	5.400%	by wt.
DI Water	12.600%	by wt.;

and mixtures thereof.

17. (Currently Amended) A two-component, increased peroxide content dental bleaching system adapted to be admixed and applied to the teeth for sustained contact, said system comprising:

a first component comprising a mixture of carbamide peroxide and hydrogen peroxide, and

a second component comprising an orally compatible activator

gel comprising at least one base, at least one gelling agent, at least one aliphatic polyol, and at least one flavoring agent[-], and wherein neither the first or second components incorporate a radiant energy or a heat-energy absorbing activator substance.

18. (Original) The two-component bleaching system of claim 17 wherein said at least one gelling agent is selected from a group consisting of cellulosic gums, silica, emulsifying waxes and mixtures thereof.

19. (Original) The two-component bleaching system of claim 17 wherein said at least one aliphatic polyol is selected from

the group consisting of glycerine, propylene glycol and mixtures thereof.

20. (Original) The two-component bleaching system of claim 17 wherein said at least one flavoring agent is selected from the group consisting of taste, flavor enhancement agents and mixtures thereof.

21. (Original) The two-component bleaching system of claim 18 wherein said gelling agent comprises hydroxypropyl cellulose.

22. (Original) The two-component bleaching system of claim 17 wherein said hydrogen peroxide is present in an amount of from about 1% to about 20% by weight of the first component.

23. (Original) The two-component bleaching system of claim 17 wherein said carbamide peroxide is present in an amount of from about 10% to about 20% by weight of the first component.

24. (Currently Amended) The two-component dental bleaching system wherein the components are adapted to be admixed and applied to the teeth for sustained contact, said system comprising:

a first component comprising both carbamide peroxide and hydrogen peroxide; and

a second component comprising a compatible activator gel comprising propylene glycol, hydroxypropyl cellulose, glycerin, DI water, sodium fluoride, and ~~fumed silica~~. wherein neither the

first or second components incorporate a radiant energy or a heat-energy absorbing activator substance.

25. (Original) The two-component dental bleaching system of claim 24 wherein said propylene glycol is present in an amount of from about 40% by wt. to about 50% by wt. compared to the total weight of the second component.

26. (Original) The two-component dental beaching system of claim 24 wherein said glycerin is present in an amount from about 32% by wt. to about 40% by wt. compared to the total weight of the second component.

27. (Canceled)
